Projects

SimplyTech (Rails, JavaScript, React, Redux) | Sole Developer

[Live](#) • [GitHub](#)

- ❑ Implemented Redux Pattern to create a seamless transition between pages without the need to refresh
- ❑ Utilized CSS and React event listeners to create an interactive user experience (hamburger menu, pop out reader)
- ❑ Accessed 20 websites' APIs to fetch and parse articles and render them using React components
- ❑ Implemented both backend and frontend auth, utilizing BCrypt hash and a user session state in the Redux pattern

Solve My Maze (JavaScript, React) | Sole Developer

[Live](#) • [GitHub](#)

- ❑ Implemented an iterative Breadth First Search algorithm on the underlying 2-Dimensional Array
- ❑ Utilized ReactJS and CSS to render the maze at each step of the algorithm to visualize the solution

Flex Project | Front End Engineer

[Live](#) • [GitHub](#)

- ❑ Built using React Native
- ❑ Tracks users
